Where is All the Water?

Card Sort

Investigation Question: How can we account for the water in an area?

Knowledge Probe

As water gains and loses energy it changes phase and moves between the Earth and atmosphere.

Other times water is just moving from place to place without changing phase. Complete the card sort to investigate the processes involved in the water cycle.

Card Sort:

1. Sort the water cycle terms into ROW A of the table below
2. Read the water cycle information, highlighting each term and its definition.
3. Move any terms you had in the wrong column by writing them in ROW B.
4. Complete the "I used to think, but now I know" table for any terms you moved.

	Losing Energy	Gaining Energy	Movement
A			
B
