

## Climate Graph

After completing your Research Checklist, you will need to create a hand-drawn graph that shows data that is connected to your climate issue. This graph needs to be neat—it should include a title with both the independent and dependent variable, as well as labels with units. Below the graph, you need to write a paragraph that explains the connection between the issue in your photo and climate change. This explanation should include at least two sets of data that are far apart! The requirements are listed below:

### Graph

- \*Title..... \_\_\_\_\_/2
- \*Label on X Axis..... \_\_\_\_\_/2
- \*Unit on X Axis..... \_\_\_\_\_/2
- \*Label on Y Axis..... \_\_\_\_\_/2
- \*Unit on Y Axis..... \_\_\_\_\_/2
- \*Data goes back before 2000..... \_\_\_\_\_/1

### Explanation of Data

- \*Explain the connection between the issue in your photo and climate change... \_\_\_\_\_/3
- \*Explain the data that supports this..... \_\_\_\_\_/3
- \*2 Sets of Data the Demonstrate Change (Years must be far apart!)..... \_\_\_\_\_/2
- \*Sources Cited (URL)..... \_\_\_\_\_/1

Total \_\_\_\_\_/20
