**Climate Research Checklist**

What is the title of your article? Is there an author?

---

Is your website from a good source? How do you know?

---

---

---

---

Does your website have data? What does that data look like (bar graph, line graph, etc.)?

---

How many years does the data show (ex. 1999-2019, 20 years)?

---

What are two sets of data that are spaced far apart (ex. 1999, 20° C, while in 2019, 45° C)?

---

In your own words, what is your source telling you?

---

---

---

---

How does this relate to climate change?

---

---

---

---

What is your URL ([www.google.com](http://www.google.com))? \_\_\_\_\_
